OBESITY TEACHING MODULE 2027

Bedside Teaching in Obesity Medicine

Obesity is a chronic disease – and treating it is teamwork. Our bedside teaching shows obesity medicine where it happens: in the consultation room.

In a small group you follow real clinical workflows, from assessment to long-term care. You get to know the diagnostic work-up (bioimpedance analysis, indirect calorimetry, metabolic laboratory) and discuss treatment pathways – including pharmacotherapy – with our interprofessional team.

Format	2 days, hybrid: one day on site at Adimed in Winterthur, one day online
For	Physicians, medical practice assistants, APNs, PAs, dietitians, psychologists, physiotherapists
Credits	SGAIM 7 credits (applied for 2027) · SVDD 16 points
Fee	CHF 1,150 incl. course materials
Language	German and English – we adapt to the group
